THE SIEGE OF OKIEP MEDAL:

Although no official records can be found by the Okiep Copper Company, numismatists have attempted to piece together the rationale behind, as well as the history of the medal that was issued to all gallant defenders of the town.

It appears that the Cape Copper Company decided to mint it's own medal for the defence of Okiep, once it became known that the coloured members of the town's garrison were precluded from receiving the Queen's South Africa medal. Their exclusion was due to their being of non-European descent. There may, however, be more rationale behind the minting of this medal. Other besieged company towns, for example, Kimberley, had also struck medals for their defenders, and the Cape Copper Company may have wanted to follow this example, even though their operation was on a much smaller scale. The successful defence of the town had not only contributed to the success of the British forces in the Cape Colony, but also had an effect on the Namaqua Copper-, and the Cape Copper Companies. Although relatively little damage was caused in Concordia by the occupying Boer forces, damage was done to the property of the Cape Copper Company in Nababeep. One can attribute this to the fact that Nababeep's population had all been withdrawn to Okiep before an attack was launched on the town, whereas the Concordia garrison had remained, and had surrendered with one of the conditions being that none of the Namaqua Copper Company's equipment would be damaged or destroyed.

The defence of Okiep did, therefore, serve to protect not only the local population, who were all company employees, but also company property, as the company owned the whole town. The successful defence of the town would not have been possible, had it not been for the willingness of the Coloured population to become involved in, not only their defense, but also that of the company town. Due to the paternalistic nature of company towns, whereby an employee is totally dependant on the company for everything from housing to amenities, the local inhabitants may not have had much choice but to contribute to the towns defence. The local coloured people could have refused to participate in the preparation for, and the defence of the town, as the war was essentially seen by both sides as being a "white man's" war. More recent studies have shown that this was not the case, as people of colour were involved on both sides. The company did also not supply them with housing, or with any real amenities, but their homes were built on company land. Therefore, the interests of the company and their employees may have been considered.

Today one may criticise a present-day company for issueing such a medal, rather than improving thier workers living conditions, but one must look at what a medal signified in the early 1900's. Although a medal for the defence of Okiep is only a small token of appreciation, the item itself must have been highly treasured by the recipients. This non-racial act by the company to express it's appreciation, should also be commended, but at the same time, one should not overlook the fact that this very guesture was reinforcing the paternalistic nature of their relationship with their employees.

It is presumed that all ranks of soldiers who took part in the defence of Okiep received a medal. However, this is not true, as no record of the 44 men of Warwickshire Militia, nor Lt.Col. Shelton receiving this medal. Capt. Borchers of the Cape Garrison Artillery did, however, receive it. As no medal role exists, it is also presumed that all the company's men who were involved, did receive one.

The medal was minted in silver and bronze, and one would expect that the officers would have received the silver, while the ranks, the bronze. This generalisation, however, can not be made, as Pay Sgt.H. Rodda, No.60, NTGB, also received a silver medal, along with Cpl.D.R. Howard, No. 539, NTGB. The former was the Company accountant, while the latter is presumed to be Dr. R.N. Howard. These two are the only known exceptions, so the theory may be assumed true.

Unlike other military medals, these were not handed out at a parade, but appear to have been given to the company staff along with their pay packets. The medal was also not officially recognised by the military authorities, and therefore could not be worn along with others.

Description of the medal:

Obverse: A miner standing with legs crossed and holding a shovel in his right hand, with his left resting on the edge of a cocopan on rails. A rising sun above a hill in the left background. The whole surrounded by the legend THE CAPE COPPER COMPANY LIMITED 1888.
